---

Thanks Eric - I knew you would have all of this in your head. Were any of the Round 3A samples repeat locations from Round 2A (single point source), or were they characterizing new areas?

-Jennifer

Subject: Re: Water Samples

Jennifer, there were a number of samples collected for a number of purposes. Here is a quick summary:

Round 2A:

Amphibian Habitat/Source Area: 14 (collected 1 foot off bottom)  
Beach/Source: 3 (collected 1 foot off bottom)  
Human Use: 3 (depth integrated)  
Transects: 3 (depth and laterally integrated)

Round 3A:

Single Point Source: 12 (near bottom and near surface samples at each location)  
Transects: 10 (depth and laterally integrated; RM 2 and 11 transects included three depth integrated samples (E,W and Channel)).

Eric

	Water Samples	Subject

Does anyone off the top of their heads know how many source specific water samples we have? (e.g. not transect samples)?
